

## RGA4

### FALL ARREST BLOCK WITH RECOVERY WINCH - 15M

**The RGA4 is a three way retrieval block fitted with an up/down winch mechanism and the standard fall arrest capability.**

This unit can be used as a standard fall arrest block, but in the event of a fall the operative can be winched up or down to safety almost immediately. The winch function is for use only as a recovery provision and not for access/egress. This arrangement must be backed up with an independent separate fall arrest system, and a rescue provision that is also separate to the winch. The RGA4 is supplied with galvanised wire cable.

Accredited to: EN 360:2002

Line material: 5mm galvanised wire cable

Case material: Alloy

Connector: Double action high tensile steel swivel karabiner

Weight: 11.4kg

Max user weight: 140kg

Max force: <6kN

Handle turn ratio: 1:10

Handle force ratio: 1:10

Built in fall indicator

Recovery winch
